

THE CIRCLE GAME

Using the circles below, draw as many circular designs as you can in 30 minutes. Think of all the circles you can remember both in nature and those that are man-made.

As a group, you should decide if the drawing must stay inside the circle or if the circle is simply part of the overall design. (Ex: A clock face where everything exists inside the circle vs. a Christmas ornament where the top hanger would be above the circle.)

After the time frame, score points for original designs, the most common designs, or any criteria you would like.
